Objective

Computer engineering student looking for opportunities to create better software with a strong development team.

Education

University of California, Santa Barbara

2014 - current

- Computer science and electrical engineering major

Lowell High School, San Francisco, CA

Class of 2014

- AP Scholar with Distinction
- National AP Scholar
- Emphasis on AP Calculus BC, AP Computer Science A, and AP Physics B/C Mechanics/Electricity & Magnetism

Skills

- Knowledgeable in Python, C++, Java, SQL, CSS
- Proficient in HTML, JavaScript
- Experience with jQuery, node.js, Android Studio, Github
- Above-average typing speed (consistent 80 wpm)
- Detail-oriented

Experience

Network Consultant at UCSB Residential Computer Network

April 2015– current

- Diagnosed network problems and assisted residents in the residential halls and the campus-owned apartments with Internet connection issues. This included setting up and replacing wireless access points and backup batteries, and patching Ethernet cables.
- Provided customer service by helping people to connect to the Internet. Created support tickets and scheduled appointments for residents to bring in their computers for virus-related issues.

LA Hacks

Spring 2015

- Started with Android app development using API 21 (Lollipop)
